

Mission End Frame Assembly

Arrange Legs so that the 32, 3/16" holes in each Leg are facing up. Arrange Frame Blocks so that 1" diameter pocket is likewise facing up. Make sure bottoms of Legs are pointing same way. bottoms of legs will be marked "LF", "LR", etc.

Drop Legs with screws onto Frame Blocks.

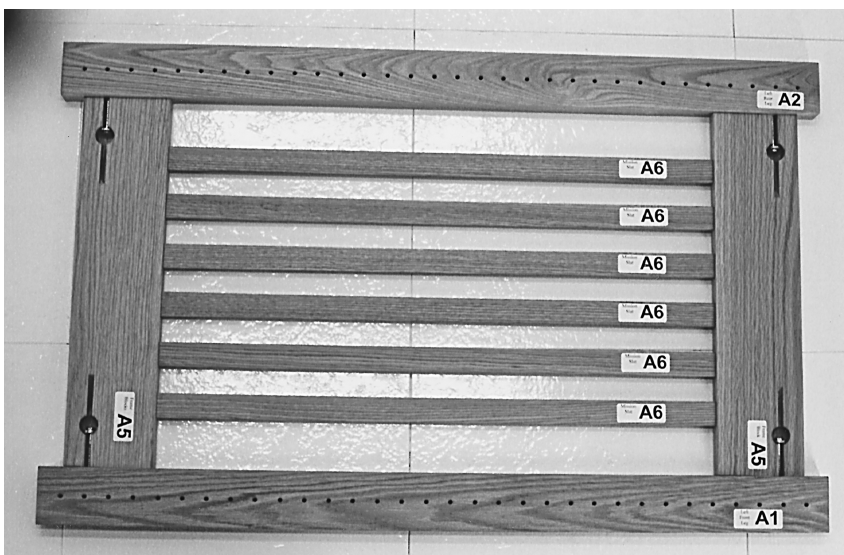

Both washers for each screw should be under the head of the screw, and not between the wood parts.

A7 End Frame Gauges

A B1 Stationary Slide can be placed diagonally across Leg and Frame Block while tightening. Apply pressure to Stationary Slide with one hand, while tightening with the other. This will keep the Frame Block and Leg in alignment.

Tighten screws.

When finished, the Left Hand End Frame should look like this.

Assemble Right Hand End Frame using parts A2, A3 and A5.
