

Standard Style End Frame Assembly (continued)

Both washers for each screw should be under the head of the screw, and not between the wood parts.

A Stationary Slide (B1) can be placed diagonally across Leg and Block while tightening. Apply pressure to Stationary Slide with one hand, while tightening with the other. This will keep the Block and Leg in alignment.

Tighten Screws.

When finished, the Left Hand End Frame should look like this.

Assemble Right Hand End Frame using parts A2, A3 and A5
