

## Tilt Pin Assembly and Use

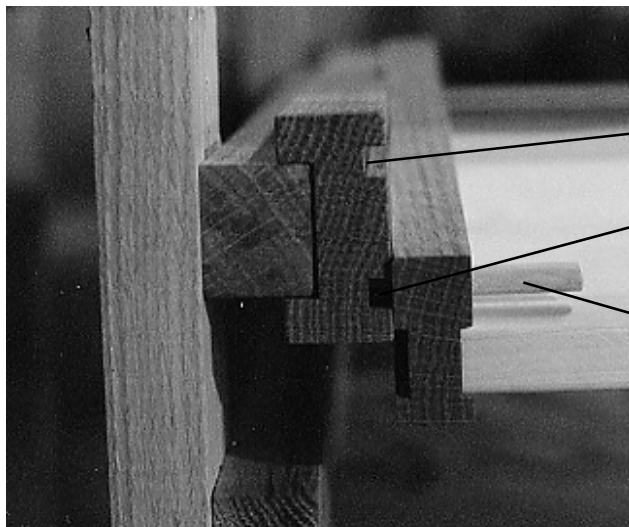

Tilt Slide

### Negative Angle

Insertion of the F4 Tilt Pin in this manner generates negative angles of up to 25 degrees, depending upon which hole is selected.

Negative angles are used primarily in positioning of the keyboard

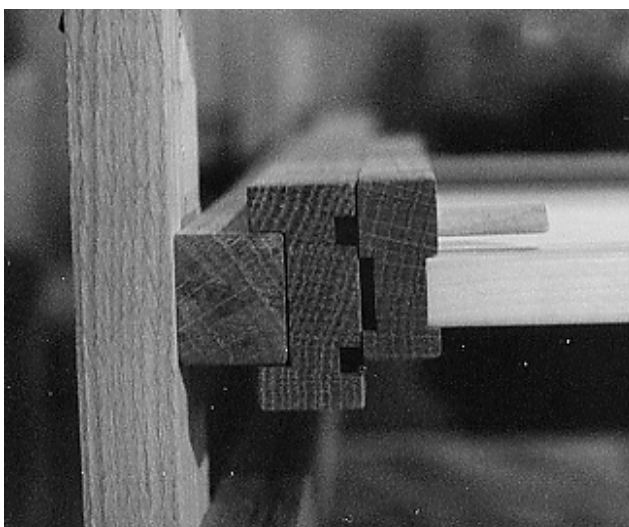

upper slot

lower slot

Tilt Pin

### Positive Angle

Insertion of the F4 Tilt Pin in this manner generates positive angles of up to 45 degrees depending upon which hole is selected.

### No Angle

By engaging the F4 Tilt Pin in the upper slot as shown, no angle is generated, and the Work Surface will be flat.
